

EV Ready Program

Peninsula Clean Energy has launched a \$24 million program to support the deployment of electric vehicle charging stations at multi-unit dwellings. The program includes free technical assistance, generous rebates and preferred pricing for EV charging stations.

What Are the Benefits of Having EV Charging Stations?

Electric vehicles are good for the environment and our community. Along with increasing tenant satisfaction and giving residents an option to charge their vehicles overnight, the benefits of adding EV charging stations include:

- Achieving sustainability goals
- Being a leader in the community
- Attracting and retaining tenants
- Helping reach the goal of being 100% greenhouse gas-free by 2045

How Will Peninsula Clean Energy Help With My Project?

Peninsula Clean Energy will be there every step of the way. When you work with us, you will receive these complimentary benefits:

- A streamlined design, planning and construction process
- Access to preferred pricing for EV charging stations
- Free technical assistance provided by Peninsula Clean Energy's partner, CLEAResult, throughout the planning and installation process
- Referrals to qualified contractors

Apply to the EV Ready Program

Lead the Charge to Support Electric Vehicles

Electric vehicles are gaining traction, which has expanded the need for EV chargers for tenant overnight charging. If your property is looking to expand into the sustainable future, Peninsula Clean Energy is here to help.

EV Ready Free Technical Assistance

Peninsula Clean Energy will provide free technical assistance for your EV charging station project through its program partner, CLEAResult. This includes:

- **Site visit.** A field technician will conduct an onsite evaluation of your facility and will provide you with a Charging Evaluation (CE).
- **Load analysis.** The CE will include a load calculation that specifies the number of chargers that can be supported by your current electrical infrastructure.
- **Site layout.** Included in the CE will also be a proposed parking layout, which provides a baseline for program contractors to prepare price bids and designs.
- **Contractor bids.** We will help create and publish bid documents as well as help you assess each bid to ensure you choose the right bid and contractor.
- **Permit support.** After a bid has been chosen, we will provide permit support to your contractor and act as a liaison with the building department for permit processing.
- **Installation process.** Oversight and document management will be arranged to make sure your project is delivered in a timely manner.
- **Rebate assistance.** Once your project has been successfully completed, we will help you to procure your rebates.

Apply to the EV Ready Program
